Statement concerning the absence of chemical substances

Dear Ladies and Gentlemen,

Based on data provided by our raw material suppliers some additives in our recipes can be of animal origin.

Manufacturing of these substances fulfills the conditions of section 6.4 of "Note for guidance on minimising the risk of transmitting animal spongiform encephalopathy agents via human and veterinary medicinal products" (EMA/410/01 Rev. 3 - effective from 01/07/2011).

There are derived from fat that can be of animal origin, but plastic material is exposed to temperature above 200 °C and 65 bar pressure for several minutes during the extrusion.

So our product is to be considered safe to BSE and TSE transmissions.

This confirmation relates to all products of Profol Greiz GmbH.

For further questions, please do not hesitate to contact us.

Best regards

your **Profol Greiz GmbH**

This document has been created digitally and is valid without signature

(*) Intentionally used or added means to achieve a physical, chemical or quality effect during processing of the plastic or in the final material or article; it is intended to be present in the final material or article.

Information

We would like to point out that this declaration is not intended to guarantee a certain quality or specific characteristics of our products. Profol Greiz GmbH does not carry out investigations on its products, the raw materials and auxiliary materials or additives used during production in order to prove the presence of substances, substances or compounds which are subject to the above regulations, provisions or terms. Upon request, we can perform specific tests on a per fee basis.
