

Unmatched strength: MDO PP films for excellent mechanical properties

Application examples*

Built to resist, built to recycle: MOPP films combining strength with sustainability

MDO PP film - stretched in machine direction - is unbeatable in terms of mechanical properties in the longitudinal direction. It is safe, reproducible and highly efficient for high-volume production. MOPP film from Profol is ideal for mono PP packaging solutions as well as many other technical applications.

Applications

Packaging

Release liner

Carry handle

Labels

Tape,
strapping tape

Separation and
bundling of cables

Important functions

- + Extremely high tensile and tear strength with low elongation
- + High stiffness
- + Excellent processability and machinability

Specifications

- + Standard thickness range: 25-80µm
- + Width: up to 2.300mm
- + Colors: transparent, translucent colors
- + Siliconizable film type available
