

Prodesign™

Thermoplastic wear layer for short-cycle presses

Prodesign™

From laminate to luxury design surfaces

A newly developed coated PP wear layer as a thermoplastic overlay sets new standards. Specifically designed to be processed in short-cycle presses (SC presses), this scratch-resistant film provides a clear advantage in the finishing of design surfaces for furniture. It turns a simple laminate structure into high-quality furniture surfaces with an extremely durable wear layer.

Key Features

Foot warm & low noise

Moisture resistance

Low CO₂ footprint

Natural look & feel

UV light resistance

PVC-free

Scratch & abrasion resistant

Embossed in Register (EIR) possible

SVHC-free

Specifications

> Thickness: ~ 120 µm

> Width: up to 2.200mm

> Excimer coating, transparent
